Consulting Technical Editor

Matt CULHAM, Toronto, Canada

The *Journal of Theoretical & Experimental Pharmacology* is an open-access journal published electronically by PremiumReasons<sup>®</sup>, located in Toronto, Ontario, Canada.

Published manuscripts are peer-reviewed by scientists with proven reputation in their field. Substantial efforts are made to publish only those manuscripts that properly justified the aim of the study, used appropriate methods, adequately summarized the results, and provided a sufficient analysis of the literature in comparison to the findings of the study. However, manuscripts published by the journal represent the sole opinion of the authors. PremiumReasons<sup>®</sup>, the Editor or the Editorial Board of the *Journal of Theoretical & Experimental Pharmacology* cannot assume any responsibility for the procedures, methods, chemical compounds, drugs, doses, statements of facts, or opinions expressed in the manuscripts, or any involuntary or intentional failure to disclose conflicts of interests. In addition, selected manuscripts may discuss investigational drugs or unlabeled uses of approved medications, or use of devices that had not been yet approved by regulatory agencies.

All rights are reserved, and other than private or academic use, no part of the publication may be reproduced, stored, transmitted, or disseminated in any form or by any means for commercial purposes without prior written permission from the publisher. For a complete guide of our publications, publishing programs, permissions, or any other information, you are invited to visit our website at [www.premiumreasons.com](http://www.premiumreasons.com) or to contact us by e-mail to: [services@premiumreasons.com](mailto:services@premiumreasons.com).

Finally, in order to promote and encourage environmental awareness, PremiumReasons<sup>®</sup> invites the readers of the *Journal of Theoretical & Experimental Pharmacology* to use the electronic version of the manuscripts rather than printing hard copies of the documents.
